

Manned Guarding

The core of security

Intervention of technology has broadened the role of enterprise level security with new systems enhancing the capability of security teams.

However, these systems are more effective when they are combined with onsite security personnel.

Key benefits:

- 01

Psychological impact is high

Mere presence of onsite security is enough to deter criminals.

- 02

Unrivalled knowledge & experience

Human knowledge and intuition cannot be matched by automated systems.

- 03

Boosts confidence & spirits

On site personnel have high visibility with quick response capability which boosts confidence of clients.

- 04

Cross functional capability

Security officers are trained to respond to several scenarios like fire, CPR, first AID etc.
- 05

Reliability

Having human presence is always more reliable as compared to systems which are prone to damage and downtime.
- 06

The human connect

Having a direct contact with people who are handling your security is always more confidence boosting than machines.
