

WHAT'S UP IN SECURITY? HIGH SECURITY FOR VEHICLES

HSRP License Plates:

New car buyers need not worry about the long queue at the registration authorities as all new vehicles sold in the country will come fitted with HSRPs.

What is HSRP?

HSRP- High Security Registration Plate, is a high security number plate that will form a uniform pattern of displaying your vehicle's registration number throughout the country.

How will it secure our vehicles?

Also feature a non-removable snap on lock and if in any case somehow removed then also it will remain non-reusable

Alu Are made of aluminium

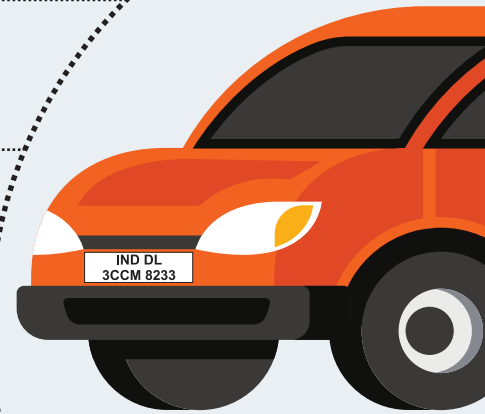

A self-destructive sticker with engine and chassis number of your car

A unique seven-digit laser code

A chakra hologram to prevent counterfeiting

What is wrong with your existing number plates?

- Very easy to tamper
- Makes car theft very easy
- Customization makes difficult for the police to catch those vehicles who happen to break traffic rules
- The cops can't track down a car if they aren't able to read the number plates
- Aid in creating a national data of all the motor vehicles
